## OBJECTIVE OF THE CONFERENCE

The International Conference on Innovation and Intellectual Property Rights aims to encourage a global dialogue amongst academia, industry, and government stakeholders to drive collaboration and innovation in the field of Intellectual Property (IP) protection. The conference seeks to discuss the challenges and opportunities that arise from IP usage and its impact on society, industry, and the economy.

The primary objectives of the conference are to identify current trends in the use of IP in both public and private sectors, and to explore ways of increasing the benefits to both individuals and organizations from the development of effective IP strategies. Additionally, the conference will provide an opportunity for participants to gain an understanding of the legal frameworks governing the use of intellectual property in different countries.

In addition to exploring strategies for the efficient management and protection of IP, the conference will also focus on promoting the importance of innovation and creativity in IP usage and protection. It will feature debates and presentations from representatives from academia, industry, and government in order to foster an exchange of ideas, experiences, and best practices. The conference intends to create a platform to discuss the concept of 'open innovation', which encourages collaboration and sharing of resources in order to generate new products and services.
